

## TGA/Micro 1000 Adapter Module

## TGA 709-0035

- **Adapts any Micro 1000 module to a TGA Rack Module**
- **Master and Slave Converter Adapters available**
- **Facilitates Micro modules directly in a TGA backplane**
- **Maximises benefits of TGA rack systems**
- **Cost effective way to convert older Micro 1000 systems to TGA**

The TGA/Micro 1000 adapter module is designed to allow Micro 1000 modules to plug directly into a TGA backplane. In situations where just one or two Micro 1000 modules are required for a system configuration this module is a more cost effective solution rather than fitting a complete Micro 1000 sub-rack.

The TGA backplane structure has been designed to be compatible with the older Micro 1000 structure. This means that the Micro 1000 modules are not obsoleted by the newer TGA and VXI system architectures. The TGA/Micro 1000 adapter module is one way of adapting existing Micro 1000 modules to the new backplane structure.

If there are a significant number of Micro modules to be used (greater than four) then it may be more practical and cost effective to use a Micro 1000 sub-rack to house these modules.

The TGA/Micro 1000 adapter module is another example of the strategy that Intepro have adopted in our test systems design. We will not obsolete any investment that our customers have made in our test systems.

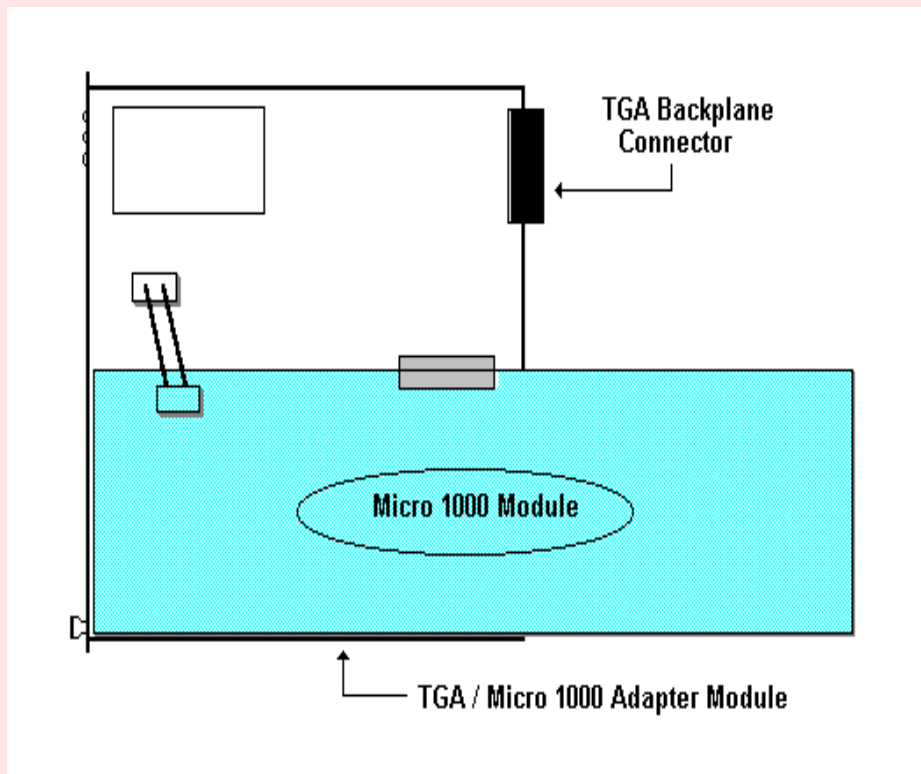

The TGA/Micro 1000 adapter module allows users to

- (1) Adapt Micro modules to TGA Backplanes
- (2) Utilise Micro modules in conjunction with TGA modules to maximise Cost/Performance benefits
- (3) Re-use Micro Modules from older systems in newer TGA based system configurations

The adapter module provides the Power and signal control lines directly from the TGA backplane to the Micro 1000 module. The Micro 1000 module operates in its normal fashion and the fact that it is located in a TGA rack is completely transparent to the controlling software or the users test programs.

## Technical Specifications

<b>Micro 1000 :</b> Single Width or Double Width	<b>Size :</b> 233mm x 220mm x 45mm TGA module (H x D x W)
<b>Operating Temp :</b> 0°C to 55°C	<b>Humidity :</b> 10% to 85% Relative
<b>Storage Temp :</b> 0°C to 70°C	

## Ordering information

706-0035 TGA/Micro 1000 Adapter Module

## Options

**Intepro Systems**  
1530 S. Lyon Street  
Santa Ana, CA 92705
